One of the ways drivers can play their part in caring for Creation is by switching to a planet-friendly, all electric vehicle – an EV. With their lower emissions, EVs aren't just better for the climate, they're cheaper to run, too. And we're here to help you get started.

We've been bringing great value motoring deals to the clergy for 25 years, and we're leading the way to help you move to electric powered driving.

Through Project EVe we're working closely with Dioceses across the country to share our expertise and knowledge and help you go green. We can answer all your questions – from how to charge your car, to how far you can travel on one charge, and which EVs offer the best value.

Through our specialist installation partner, we can also help you install charging equipment* or simply advise on the best type of charger for your location.

Mgr Mark Crisp

What do our customers say?

"I was nervous about switching to an electric car but from the moment it arrived I have had no regrets. It is perfect for my needs in the parish where I make many frequent short trips around the city.

"I only need to charge it once a week, overnight. Before the car was delivered, we had to arrange for the charging point to be fixed to the wall outside my garage. This was done very efficiently within a couple of hours, and it is very easy to use."

We're giving the green light to these all-electric offers, available now
